

Duty of Care for Fleets

Moving beyond legal compliance

It is essential that companies meet their legal and moral responsibilities for the safety of their drivers and other road users. At this workshop, you will be brought up-to-date with the latest legal perspectives and how recent changes to corporate manslaughter legislation are being implemented. Learn how to use fleet safety policies and procedures that move beyond legal compliance, helping to keep employees and the wider community safe on the roads, which in turn saves money and protects your company's image. As well as experts in the field, the workshop will include a fleet operator talking about their experience and sharing best practice.
